

Automated Documentation to Extract Learning from EEG (ADELE)

Meeting 3
March 1st, 2021

Updates on previous week

- Denoise the data with rolling averages
- Visualize non-EEG biometric markers
- Layouts for the documentation

Things to do

- Implement unsupervised classification
 - On different EEG bands
 - Non-EEG biometrics
- Quantify cluster with statistics
 - Average heart rate
 - Pupil diameter
- Create a linked table of contents
