

Automated Documentation to Extract Learning from EEG (ADELE)

Meeting 4
March 8th, 2021

Things to do

- Start writing functions for the documenter
- ADELE
 - Functions
 - createPage/header/text/plot
 - createUnsupClassification/eegHeatmap/denoise
 - tableOfContents/coverPage
 - Examples
 - Twitter scrolling (document name)
 - Contents (images)
 - Page 1
 - Page 2
 - Requirements.txt

Document layout

- Cover page for the document
- Hyperlinked table of contents (produced after the other pages)
- Each page would have a title
 - Time window of the sub-event
- Use placeholders for EEG heatmaps for the moment
- Text: Statistics of non-EEG biometrics
 - Average/max HR
 - Average Pupil Diameter
